EDUCATIONAL COLUMN.

G. V. DOWELL, EDITOR.

Paper ordered for the Kentucky

Exhibit at the Columbian Exposition

by the Teachers League is now ready.

Parties needing the same will call at

once and get what they need.

The following schools are being

taught this spring: No. 60, 62, 22,

45, 76, 58.

Trustees will receive in a few days

their census reports. Please take

great pains in filling the same as the

bill now before the Legislature looks

rewards the schools as well as the

equal as possible. Quite a number of

districts or sections must be recon-

sidered if the bill passes and becomes a

law.

NOTE.

Last Saturday was the day for the

regular meeting of the County Edu-

cational League, which was held in

the office of Supt. Froese. The meet-

ing was a very interesting one and

we hope that on the fourth Saturday in

March the teachers will send their

representatives to the meeting.

We shall expect the heavy co-operation

of every teacher in the county.

To get up a creditable exhibit for

the Columbian Exposition, Christian

country has a representation

and this can only be procured where

every teacher co-operates.

Prof. H. L. Holt writes he will get

up some work. He will please send

the material to the office of Supt. Froese.

The work must be in by March 17th '93.

S. L. FROESE.

The following paper was read by

Miss Mattie Reese, Ph.D., at County

Educational League.

UNCONSCIOUS TUITION.

Read by Miss Mattie Reese, Ph.D., at County

Educational League.

Unconscious tuition is the part of

the teacher's work which he does when

he seems to be doing nothing at all his

work.

Some of the most instructive and

effective functions of the teacher are

those performed when he seems to be

the least instructive.

There are three main propositions

under the head of unconscious tuition.

1. That there is an educating power

latent from the teacher's mind, but

not by immediate desire, but

instinctively and involuntarily, as in

the case of his function as an

element in it. 2d. That his uncon-

scious tuition is yet not the product of

caprice, or of accident, but takes its

origin from the unconscious substance

of the teacher's character. 3d. That

as it is an emanation favoring

the very spirit of his own life,

so it is an influence acting in

favor to form the life of the scholar.

All the truth that is to be taught

the teacher cannot be expressed in

words, after all has been said and

it that you can say, you still find

that language is so inadequate to

express the thought and feeling that

the teacher has in his mind.

Dr. Chatham expressed this same

thought when he said, that everybody

thinks more than he can say, and

that the man that says more than

he thinks, is a fool.

We are taught, and we teach, by

everything about us that never goes

into the language at all. This brings

before us the fact that the teacher

and best teaching of children and

that which best awakens the mind to

the grandest and noblest of thoughts

is this unconscious tuition, this lift-

ing them into a higher sphere of the

thoughts that can never be explained

making them to feel those thoughts

and beauties that has caused the mind

to feel wonder.

There are different organs in our
